Course Title:  Digital Photography Fundamentals in a Day

Course Description:
Beginner-level information for taking great photos, and/or deciding on a new digital camera.

Course Prerequisite(s): None

Course Objectives:
Demonstrate competency with digital camera features

Next Class Possibilities:
Digital Photography Basics – Point ‘N Shoot; Digital Photography Basics – dSLR

Lesson Plan – by week or session
Session AM: Point and Shoot vs DSLR - Explaining the combined components that make a great image. Introducing the beginner DSLR, or point and shoot.

Session PM: How to pare all the components together (aperture, shutter speed, ISO, etc). to get desired results. Introduction to composition and how it plays a great part in the making of an image. Discussion on the abilities of the various cameras and what are you looking for in your camera.
