Course Title: Fireworks for PC and Mac

Course Description:
Learn to use this graphics production tool that allows Web graphic designers to work with both vector art and bitmap images. This course gives the Web designer the freedom to develop imaginative design ideas and easy-to-use "live" effects, animation, and custom style features. Work with professional design tools such as slices, color palettes, effects, precise cursors, brush and pencil tools.

Course Prerequisite(s):
Experience with Web page design

Course Objectives:
Learn to use the graphics productions tool that allows Web graphic designers to work with both vector art and bitmap images.

Textbook(s): OPTIONAL
Adobe Fireworks CS6 Classroom in a Book
Adobe Press

Lesson Plan – by week or session
