Collin College - Continuing Education

Course Syllabus

Course Title: Landscaping with Native Plants

Instructor: Carrie Dubberley, President of Dubberley Landscape
214-770-6252 carrie@dubberleylandscape.com

Course Description:
Course discussion will center on native trees, shrubs, vines, grasses and perennials that grow well in North Texas. Learn how to use these drought tolerant plants successfully in your landscape for year round interest and color. Handouts will be provided with color pictures and descriptions.

Hours: 8 Sessions: 4

Course Prerequisite(s): None

Course Objectives:
1. Have a general knowledge of the basic environmental and soil conditions which affect plant growth.
2. Identify the plants which are best suited for the North Texas area.
3. List the cultural requirements for plants which are recommended for the North Texas area.
4. Apply the principles learned for problem solving with the native plants of North Texas.

Textbook(s): How to create a Stylish Garden from Design to the Dirty Work
Publisher: Environments, Author: Dixon, Kelly (kellyforedixon@gmail.com)

Lesson Plan

Session 1: Trees and Shrubs
Session 2: Shrubs and Vines
Session 3: Grasses and Perennials
Session 4: Perennials
